ABOUT ME

I'm a data analyst with 1+ years of experience. I'm skilled in Python for data analysis and API development, building interactive dashboards with Tableau, integrating data from various databases, and writing and optimizing SQL queries. I'm eager to learn and can quickly adapt to new tools or requirements when needed.

EDUCATION

❖ **Airlangga University – Bachelor's Degree in Statistics** (Aug 2018 – Nov 2022) (GPA 3.42/4.00)

EXPERIENCE

❖ **PT Pos Indonesia – Bootcamp Digital Talent II** (Jan 2024 – Jul 2024)

- Developed internal systems (ITMS NOVA & SiPenDi) with a small cross-functional team.
- Designed business processes, app prototypes, and database schemas.
- Created and optimized ER diagrams for application data flow.

❖ **PT Pos Indonesia – Reporting Data Analytics** (Aug 2024 – presents)

- Performed data analysis with Python.
- Built interactive dashboards in Tableau (calculated fields & custom measures).
- Ensured data quality and consistency through validation and monitoring.
- Integrated dashboards with multiple data sources and designed database schemas.
- Developed APIs with FastAPI and validated data models using Pydantic.

PROJECTS / STUDY CASES

- [Predicting House Prices – Python \(Study Case\)](#)
- [Rocket Landing Predictions – Python \(Study Case\)](#)
- [Credit Score Classification – Python \(Study Case\)](#)
- [Customer Churn Prediction – Python \(Study Case\)](#)
- [Route Optimization API – FastAPI Python](#)
- [Sentiment Analysis API – FastAPI Python](#)
- PosAja! Customer Engagement Dashboard and PosAja! Digital Business Performance Dashboard – Tableau (Private)
- Remittance Fraud Risk Dashboard – Tableau (Private)
- PLN Transaction Dashboard – Tableau (Private)
- Analysis of Suspected Fraud Cases in Cash-In and Cash-Out Activities – Python & Tableau (Private)
- Analysis Report of the Revenue Decline in PosAja! – Python & Tableau (Private)
- Analysis Report of Delivery Performance Semester 1 2024 – Python & Tableau (Private)

SKILLS

- ❖ **Python**
 - Data analysis (Jupyter Notebook, NumPy, Pandas), visualization (Matplotlib, Seaborn), ML (Scikit-learn), API development (FastAPI, Pydantic)
- ❖ **Databases**
 - Relational: MySQL, PostgreSQL, Amazon Redshift, Microsoft SQL Server
 - NoSQL: MongoDB
- ❖ **Data Visualization**
 - Tableau, Power BI, Looker
- ❖ **Other Tools**
 - Microsoft Office (Excel, PowerPoint, Word)
 - AWS (EC2, S3, IAM, RDS)
 - Git/GitHub (repos, commits, branches, PRs)
 - Linux basics & shell scripting
 - JavaScript, TypeScript, React.js
 - Project management tools: Trello

TRAININGS / COURSES

- [IBM Data Science Specialization](#)
- [IBM Data Analyst Specialization](#)
- [Data Visualization with Tableau Specialization](#)
- [The Ultimate MySQL Bootcamp](#)
- [Getting Started with Git and GitHub](#)
- [AWS Cloud Technical Essentials](#)
