ABOUT ME

Data Analyst with 2+ years of experience using Python, SQL, Excel, and Tableau. Experienced in data querying, analysis, dashboard development, and reporting. Familiar with data engineering and software engineering concepts. Fast learner, adaptable, and results-oriented.

SKILLS

❖ Programming & Analysis

- Python: NumPy, Pandas, Matplotlib, Seaborn, scikit-learn
- SQL: querying, joining, filtering, and aggregating data from databases.
- Excel: pivot tables, VLOOKUP/XLOOKUP, IF, SUMIFS, charts

❖ Database Systems

- Relational: MySQL, PostgreSQL, Microsoft SQL Server, etc
- NoSQL: MongoDB

❖ Dashboards & Visualization

- Tableau, Power BI, Looker

❖ Additional Tools

- PowerPoint & Word (presentation and reporting)
- Apache Airflow (ETL / data pipelines)
- AWS (S3, DMS, Redshift, IAM)
- Git/GitHub
- Linux & shell scripting
- FastAPI, Javascript, Typescript, React, Next.js, Node.js
- Trello (Project management tools)

EDUCATION & EXPERIENCE

❖ Airlangga University – Bachelor's Degree in Statistics *(Aug 2018 – Nov 2022) (GPA 3.42/4.00)*

❖ PT Pos Indonesia – Bootcamp Digital Talent II *(Jan 2024 – Jul 2024)*

- Developed internal systems (ITMS NOVA, SiPenDi) in a cross-functional team.
- Designed business processes, application workflows, and database schemas.
- Created and optimized entity relationship diagrams for relational data modeling.

❖ PT Pos Indonesia – Reporting and Data Analytics *(Aug 2024 – presents)*

- Performed end-to-end data analysis using Python, SQL, and Excel, and produced analytical reports with actionable insights.
- Built interactive dashboards in Tableau using calculated fields and custom measures.
- Developed ETL pipelines in Apache Airflow using Python and SQL.
- Monitored scheduled workflows and troubleshoot failures to ensure reliable data processing.
- Processed and transformed data to deliver analytics-ready datasets.
- Developed and documented REST APIs using FastAPI and Pydantic.

PROJECTS / STUDY CASES

- PosAja! Customer Engagement Dashboard – Tableau
- PosAja! Digital Business Performance Dashboard – Tableau
- Pos Remittance Fraud Risk Dashboard – Tableau
- Cheap Food Market Operation Dashboard – Tableau
- PLN Transaction Dashboard – Tableau
- Analysis of Suspected Fraud Cases in Cash-In and Cash-Out Activities – Python & Tableau
- Analysis Report of the Revenue Decline in PosAja! – Python & Tableau
- Analysis Report of Delivery Performance – Python & Tableau
- [Predicting House Prices – Python \(Study Case\)](#)
- [Credit Score Classification – Python \(Study Case\)](#)
- [Customer Churn Prediction – Python \(Study Case\)](#)
- [Route Optimization API – FastAPI Python](#)
- [Sentiment Analysis API – FastAPI Python](#)

TRAININGS / COURSES

- [IBM Data Science Specialization](#)
- [IBM Data Analyst Specialization](#)
- [Data Visualization with Tableau Specialization](#)
- [The Ultimate MySQL Bootcamp](#)
- [AWS Cloud Technical Essentials](#)
- [Introduction to MongoDB](#)
